About Us

Interedwise Education Pvt. Ltd. is a dedicated consultancy firm committed to guiding Indian students and their parents through the intricate process of pursuing medical education (MBBS) abroad. Recognizing the challenges posed by limited seats and high competition in Indian medical colleges, Interedwise offers comprehensive support to help students capitalize on international opportunities.

Services Offered :

- 1. University Selection :** With partnerships spanning over 1000 international universities and colleges, Interedwise assists students in identifying institutions that align with their academic goals and financial considerations. This includes evaluating factors such as curriculum quality, technological advancements, and opportunities for clinical exposure.
- 2. Admission Assistance :** The consultancy provides end-to-end support in the admission process, ensuring that applications are meticulously prepared and submitted in a timely manner. This involves guidance on eligibility criteria, documentation, and meeting specific university requirements.
- 3. Visa Processing :** Navigating visa procedures can be daunting. Interedwise offers expert assistance to ensure that all visa applications are accurately completed, increasing the likelihood of approval.
- 4. Accommodation and Travel Arrangements :** To ensure a smooth transition to life abroad, the firm helps in securing suitable housing and organizes travel plans, making the relocation process as seamless as possible.
- 5. Pre-Departure and Post-Landing Support :** Interedwise conducts orientation sessions to prepare students for the cultural and academic environment they will encounter. Additionally, ongoing support is provided to address any challenges faced after arrival.

Guidance on Selecting Universities and Preparation:

- **Accreditation and Recognition:** It's imperative to choose universities recognized by relevant medical councils and international bodies to ensure global acceptance of the degree.
- **Language Proficiency:** Proficiency in the medium of instruction is crucial. Interedwise offers coaching for exams like IELTS, TOEFL, and PTE to help students meet language requirements.
- **Financial Planning:** Understanding the fee structure and living expenses is essential. The consultancy provides detailed insights into costs associated with various universities and countries, aiding in informed decision-making.
- **Entrance Examinations:** While many foreign universities do not require entrance exams, students aiming to practice in India post-graduation must qualify for the this exam. Interedwise offers guidance on preparing for such examinations. Precautions and Considerations:
- **Cultural Adaptation:** Familiarizing oneself with the host country's culture, climate, and lifestyle is vital for a comfortable stay.
- **Language Barriers:** In non-English speaking countries, learning the local language can enhance daily interactions and clinical training experiences.
- **Clinical Exposure:** Ensuring that the chosen university has affiliations with reputable hospitals for internships and practical training is crucial for hands-on experience.
- **Post-Graduation Opportunities:** Students should explore options for residency programs and further specialization, considering the pathways to practice in desired countries, including India. By offering personalized consultancy and leveraging extensive experience in overseas education, Interedwise Education Pvt. Ltd. empowers Indian students to embark on successful medical careers globally.

MBBS in Armenia

Armenia is a landlocked country in the South Caucasus, bordering Turkey, Georgia, Azerbaijan, and Iran. It has a rich history, being one of the world's oldest civilizations and the first nation to adopt Christianity as a state religion in 301 AD. The capital, Yerevan, is one of the oldest continuously inhabited cities. Armenia is known for its stunning mountainous landscapes, ancient monasteries, and cultural heritage, including the Armenian alphabet and khachkars (stone crosses). The country has a resilient spirit, shaped by historical challenges, including the Armenian Genocide of 1915. Today, it is a developing nation with a strong diaspora worldwide.

MBBS in Lithuania (EUROPE)

Lithuania is a Baltic country in Northern Europe, known for its rich history, stunning landscapes, and vibrant culture. Its capital, Vilnius, is famous for its well-preserved medieval Old Town. Lithuania was the first Soviet republic to declare independence in 1990 and is now a member of the EU, NATO, and Schengen Zone. The country has a strong economy, driven by technology, manufacturing, and services.

EDUCATION IN LITHUANIA

Lithuania has a well-developed education system with free primary and secondary education. Higher education is highly regarded, with universities like Vilnius University (established in 1579) and Klaipeda University attracting both local and international students. Many programs are offered in English, and Lithuania is known for its strong STEM and business education.

PRACTICE IN LITHUANIA AND ABROAD

Studies of the most important clinical subjects take place in Kaunas clinics. Practical skills are gained in the hospital, through the practice of special medical modules, and in the sixth year of study - during clinical medicine practice. It is also possible to practice abroad: agreements have been signed with foreign hospitals. ERASMUS+ and other exchange programs give possibilities to study or practice in foreign universities and clinics.

CAREER OPPORTUNITIES

After completing medical degree programme, graduates are eligible to apply for the license of a medical doctor, which allows to practice primary medicine independently or work in a team with other doctors.

Take your next step in your medical career at LSMU postgraduate training which refers to a qualified physician. LSMU offers 63 accredited residency programmes to fit your specialty and interest. You can also choose a research career and continue studies in PhD.

DEGREE PROGRAMME

Duration - 6 years

Degree - MSc in Health Sciences

MBBS in Germany for Indian Students

Germany is increasingly becoming a popular destination for Indian students aspiring to pursue an MBBS degree. Known for its high-quality education system, robust healthcare infrastructure, and no-tuition fee policy in public universities, Germany offers an attractive option for medical studies. This article outlines the financial requirements, eligibility criteria, and key aspects Indian students need to consider when applying for an MBBS program in Germany.

1. Eligibility Criteria

To be eligible for an MBBS program in Germany, Indian students must meet the following requirements:

1. *Educational Qualifications:*

- Completion of higher secondary education (Class 12) with Physics, Chemistry, Biology, and English.
- A minimum of 70-80% aggregate marks in these subjects, depending on the university's requirements.
- NEET (National Eligibility cum Entrance Test) qualification is mandatory for Indian students.

2. *Language Proficiency:*

- Proficiency in the German language is essential as the majority of medical programs are taught in German. Students must achieve at least a B2 or C1 level in the Common European Framework of Reference for Languages (CEFR).

- TestDAF or DSH (Deutsche Sprachprüfung für den Hochschulzugang) scores are generally required.

3. *Entrance Exams and Preparatory Courses:*

- Some universities may require students to pass the TestAS (Test for Academic Studies), which assesses cognitive abilities.
- Students may need to enroll in a preparatory course (Studienkolleg) to bridge any academic gaps and improve language proficiency.

3. Challenges to Consider

- *Language Barrier:*

- Proficiency in German is crucial, as the medium of instruction and patient interaction in hospitals is predominantly in German.

- *Cultural Adjustment:*

- Adapting to a new culture and education system can be challenging initially but offers immense personal growth.

Conclusion

Pursuing an MBBS in Germany's public universities presents a unique blend of high-quality education and financial feasibility. With thorough preparation and commitment, Indian students can leverage this opportunity to build a successful career in medicine. By meeting the eligibility criteria, managing financial requirements, and navigating the application process diligently, students can embark on a rewarding academic journey in one of the world's most advanced educational landscapes.

2. Financial Requirements

One of the most appealing aspects of studying in Germany is the absence of tuition fees in public universities. However, there are still several costs associated with living and studying in Germany:

1. *Administrative Fees:*

- Public universities charge a nominal administrative fee each semester, ranging from €150 to €300. This fee often includes a public transportation ticket.

2. *Living Expenses:*

- Monthly living costs are estimated at €800 to €1,000, which covers accommodation, food, health insurance, transportation, and other personal expenses.

3. *Health Insurance:*

- Health insurance is mandatory for all students in Germany. Public health insurance costs approximately €80 to €100 per month.

4. *Language Courses:*

- Depending on prior knowledge of German, students might need to invest in language courses, which can cost between €3,000 and €9,000.

5. *Student Visa and Blocked Account:*

- To obtain a student visa, Indian students must show proof of sufficient financial resources. This typically involves opening a blocked account with approximately €11,208 (as of 2024) to cover one year of living expenses.

Post MBBS

1. Residency in USA

One of the most sought-after options for MBBS graduates is to pursue residency in the USA. This involves:

- ***USMLE***: Graduates must pass the United States Medical Licensing Examination (USMLE), which includes three steps designed to assess a physician's ability to apply knowledge, concepts, and principles crucial for effective patient care.
- ***Clinical Rotations***: We can assist in arranging clinical rotations in US teaching hospitals, which provide hands-on experience and exposure to the US healthcare system.
- ***Matching Process***: Guidance through the National Resident Matching Program (NRMP) is provided, helping graduates secure a residency position in their desired specialty.

2. MD / MS in United Kingdom (UK)

For those interested in advancing their medical education in the UK:

- ***No PLAB/UKMLA Required***: Unlike many other countries, the UK offers a pathway for international medical graduates (IMGs) with at least three years of post-MBBS experience to pursue MD or MS degrees without needing to pass the Professional and Linguistic Assessments Board (PLAB) or the upcoming UK Medical Licensing Assessment (UKMLA).
- ***Experience Requirement***: The three years of experience must be post-MBBS, which demonstrates the applicant's competency and readiness for advanced medical training.

3. Master of Public Health (MPH) in USA/UK/Australia

An alternative route that offers flexibility and new opportunities:

- ***Low Budget Option***: Pursuing an MPH is generally more affordable compared to direct medical residencies.
- ***Work Visa***: Completing an MPH can help secure a work visa, providing more time to settle in the country and fulfill necessary formalities for further medical training or employment.
- ***Pathway to Residency***: While not a direct route to residency, an MPH can enhance a graduate's resume, improve understanding of public health systems, and potentially lead to residency opportunities through networking and gaining relevant experience.

These options provide diverse pathways for MBBS graduates to advance their careers internationally, catering to different preferences and circumstances.

MBBS in UK & USA

Pursuing an MBBS in the UK is a prestigious option for Indian students, offering world-class education, practical training, and globally recognized degrees. The program typically lasts 5 to 6 years and leads to a Bachelor of Medicine, Bachelor of Surgery (MBBS or MBChB) degree.

Entry Requirements

| EDUCATION | ENGLISH PROFICIENCY | UCAT | REQUIREMENTS |
|-----------|---------------------|----------|------------------|
| 12 th | IELTS 7.0 | Required | SOP |
| 75-90% | TOEFL 100 | | Shadowing Doctor |
| | PTE 100 | | Interview |

Fee Structure

OTC - £3000

| Sr. No. | University Name | City | Est. in | Duration | Fee Per Year | Accommodation |
|---------|---------------------------------|------------|---------|-------------|-------------------|-----------------------|
| 1 | Buckingham University | Buckingham | 1891 | 5 to 6 Year | £38,000 - £40,000 | £800 - £1,200/month |
| 2 | University College London (UCL) | London | 1826 | 5 to 6 Year | £47,000 - £52,000 | £1,200 - £1,800/month |
| 3 | King's College London | London | 1829 | 5 to 6 Year | £40,000 - £45,000 | £1,200 - £1,800/month |
| 4 | University of Edinburgh | Scotland | 1583 | 5 to 6 Year | £35,000 - £45,000 | £800 - £1,200/month |
| 5 | University of Glasgow | Scotland | 1451 | 5 to 6 Year | £42,000 - £50,000 | £800 - £1,200/month |

In the United States, the medical degree equivalent to the Bachelor of Medicine, Bachelor of Surgery (MBBS) is the Doctor of Medicine (MD). Unlike many countries where medicine is pursued as an undergraduate degree, U.S. medical programs are graduate-level courses. Therefore, to pursue an MD in the U.S., Indian students must first complete a bachelor's degree, typically with a strong emphasis on pre-medical courses such as biology, chemistry, and physics.

Entry Requirements:

- 1. Undergraduate Degree:** A four-year bachelor's degree from an accredited institution, with coursework in sciences. (Pre Medical 4 year)
- 2. Medical College Admission Test (MCAT):** A standardized examination assessing problem-solving, critical thinking, and knowledge of natural, behavioral, and social science concepts.
- 3. Interviews:** Shortlisted candidates are typically required to attend interviews as part of the selection process.
